SECTION I THE DESIGN AND CONDUCT OF THE RESEARCH

1.1 Introduction

The Young People's Leisure and Lifestyles project was set up in the spring of 1985 with the backing of the Scottish Sports Council and the Health Promotion Research Trust. The aim of the project is to study Scotland's young people as they grow up looking in particular at the way they use their leisure time.

The project team are interested not just in what young people from ages 13 to 20 do in their spare time, but also in their opinions and attitudes to a wider range of issues and the sort of lifestyles they pursue.

The project involves a large scale survey of over eight thousand young people from remote islands in the north and west to the inner cities of lowland Scotland.

In Phase One, thirty secondary schools and nearly a hundred associated primary schools allowed us to question some of their pupils in the spring of 1987. In Phase Two, which started in September 1989, many of these young people were re-interviewed, together with their contemporaries, to monitor any changes which have occurred in their emerging lifestyles. Later, in 1991, the young people will be interviewed for a third time. As such, the project overall aims to provide a unique and ongoing picture of young people as they progress into adulthood.

1.2 Why was this study conducted?

1.2.1 European initiative

In October 1978 the Council of Europe held a seminar 'Sport for Young School Leavers'. Following from this, a working party was formed by the Scottish Sports Council in 1979 to examine the text adopted at the seminar and to comment on its relevance in terms of the Scottish situation.

1.2.2 Lack of Scottish information

The working party reviewed work already undertaken and found that although some interesting studies had been published, many of these were based on partial, volunteer or non-representative samples There was no detailed and representative database on levels and patterns of participation by young people. Moreover, there was little or no information to account for the fall-off in participation by young people in sport and other active leisure pursuits in the mid-adolescence Longitudinal information on individuals just did not exist.

1.2.1 The project is established

Following the production by Professor Leo Hendry of a literature review for the Sports Council in England, funding was applied for and obtained from the Health Promotion Research Trust, through the Scottish Sports Council. The project commenced in March 1985 and the first phase of research concluded in February 1989. The research team's commitment however is to a longitudinal study which will continue as phase two until November 1991. As such the study aims to paint both a detailed cross- sectional picture of young people's leisure and lifestyles and to provide a picture of individual lifestyles as they develop over time.

1.3 Research questions

The major purposes of Phase 1 were to explore the changing patterns of young people's leisure pursuits within the development of varying sub-cultural lifestyles; and to establish an extensive nationwide data-base from which to mount a longitudinal study of adolescents' leisure and lifestyles in Phase 2 of the project.

The five specific tasks for Phase 1 of this inquiry were:

* to explore levels and patterns of leisure participation of young people between the ages of 13 and 20 by means of a large-scale and representative sample of young Scots

* to examine reasons and motivations for participation and non-participation by groups in a range of leisure activities, with particular reference to sport and active recreation; and to consider the particular influence of factors such as age, gender and social class on leisure participation

* to gain some understanding of young people's attitudes to and perceptions of a variety of social issues - including relationships with adults and authority, attitudes to health, employment and unemployment and life values - as a reflection of their emerging lifestyles

* to look at the part played by different leisure activities in the general health and social development of adolescents

* to consider the variety of psychological and social factors associated with active leisure, sports participation, positive attitudes to health and peer acceptance

1.4 Sampling framework for the study

The overall objectives in setting up the sampling design for the cross-sectional study were that it should be both representative, random and economical in terms of money and staff resources. The assumption was also made that it would be fairly large in scale, though the ultimate size of the sample was a consequence of the type of framework chosen and the need to maintain reasonable cell sizes.

A decision was made to attempt to cover the age range 14 to 20 by means of four cohort studies (14, 16, 18 and 20 years of age). The intention was that the sample should be designed to allow either cohort follow-up studies or longitudinal traces where individuals could be contacted in two or three years time to explore change over a variety of issues.

Schools were chosen as the main medium for sampling for a variety of reasons Schools represented ready-clustered samples which were economical for fieldwork The existing contacts and reputation of the Department of Education in which the project was based made access to schools and the goodwill of headteachers and staff more likely In addition, the anticipated return rates were very high if staff would let questionnaires be administered in a controlled and uniform way under these conditions
A number of different sampling frames using schools would have been possible The project team eventually opted for a clustered one which emphasised 'ecological areas' or catchments, so that area or environmental effects could be observed across cohorts
It was estimated that thirty schools would be required to generate a sample of the appropriate size and range. One in every sixteen schools was chosen from educational directory lists of all state maintained and independent secondary schools, using a random number start and fixed sampling interval. This resulted in a set of thirty secondary schools, of which three were independent The sample generally reflected the spatial distribution of the national population. Some political regions or districts are not represented.

A decision was taken not to include List D, List G or other special schools in the cross-sectional sample. To include these would have increased the chances of over-representation of small schools, would have posed additional problems of access and would have been problematical in terms of reading handicaps. The percentage of children currently maintained in special schools in the UK as a whole is projected at 1.3% for 1987 (HMSO, 1988). This proportion of Scottish schoolchildren thus lie outwith the sampling frame, as do the very small proportion whose parents choose to have them tutored at home. This was felt to be an acceptable omission within the terms of the research brief, though a decision was taken in principle to explore further the leisure lives of adolescents in some of these sub-communities. An SED-funded study associated with the current project was undertaken into the leisure lives and lifestyles of young people in a special school in Aberdeen which copes with children with problems of truancy and social maladjustment (Welsh et al; 1989).

The two oldest cohorts (18 and 20 year olds) were sampled in a different way. Secondary schools in the sample were asked to provide register lists of their school-leaving year from two and four years previously. From these lists one in every three names was selected and sent a questionnaire by post.

Within schools, half year groups were sampled. A sample in excess of 8,000 young people was identified in advance. Some absences on the day, substitution of classes of different sizes by headteachers and the cleansing of the database of silly or inconsistent answers reduced this number to a little over 6,000 for the purposes of analysis.

1.5 Timetable and fieldwork for the study

The original intention was to undertake the cross-sectional study in the early stages of the project so that a follow-up survey within the first phase was feasible. Unfortunately this plan was overtaken by the events surrounding the 1986/7 teachers' industrial dispute with their employers and their subsequent withdrawal from many activities which included extra-curricular work and assistance with research. Discussions took place between the project team and teachers, headteachers, regional officials and trade union representatives as to the advisability of undertaking the research.

By the summer of 1986 the industrial dispute was still not fully resolved. Alternative plans and sampling frames were considered but rejected. The decision was taken to start approaching regions and schools but with the added tactic that a small army of fieldworkers would be used to ensure that the classroom teachers were not asked to undertake any additional duties.

A pilot survey of 2,000 Aberdeen young people in two catchment areas of the city was undertaken in autumn 1986. This large pilot was designed to allow an assessment of the field survey methods and different components of the questionnaire. Validity checks and feedback interviews were used to assess many of the individual items. Rough computer analyses were undertaken. These samples were not chosen to be representative and it was not thought useful to release data on this group.

As permission was gradually given by the regions and schools involved in the main survey the sample began to take shape and local fieldworkers were recruited to match areas. One principal fieldworker was assigned to one or two of the catchment areas (depending on accessibility, size and distance), along with a number of fieldwork assistants. Twenty-one principal fieldworkers were eventually employed. After a training co-ordination session, held in Stirling early in January 1986, fieldworkers were then used to liaise with the schools to set up survey timetables and arrangements.

The questionnaires were administered over a six week period to enable fieldworkers to accommodate school timetables. Fieldworkers were instructed to introduce the questionnaire to young people in a suitable but reasonably uniform way and to ensure that the questionnaire was undertaken seriously and with privacy for each child.

Absentees were handled in one of two ways. Where absenteeism was small-scale and likely to be the result of illness, postal questionnaires were sent out to children with an explanatory letter. Where there was large-scale absenteeism in one or two city centre schools, fieldworkers were instructed to return on subsequent occasions to 'mop up' as many of the absentees as possible Those who could still not be reached at school after a return visit were sent a postal questionnaire

The return rates from schools were very high, being 96% in the secondary schools Subsequent analysis has shown the quality of answers to be equally high

The return rates from the post-school cohorts were good for a postal survey, though lower than the school returns. A small inducement to return the questionnaires was provided in the form of a prize draw The return rate overall for the postal post-school survey was almost 49%.

Fieldworkers part-coded the questionnaires and then returned them to Aberdeen where cross-checking subsequently took place. Data preparation was eventually undertaken by a commercial firm in Glasgow.

Data were returned to the main frame computer at Aberdeen University to be mounted and verified. Analysis of the data began in November 1987.

1.6 Components of the questionnaire

Research hypotheses had clearly generated a number of areas of enquiry that needed to be included in the questionnaire. A number of other factors acted as constraints upon what the team felt they could actually include. The survey was designed to cover a large age span (14-20 years). questions which one could legitimately ask a twenty-year old would not be acceptable for the younger cohort; questions which seemed appropriate for the lifestyle of a 14 year old child would be redundant in the context of a married 20 year old woman with a child of her own. Separate questionnaires for each cohort would have increased expense and created logistical problems for fieldworkers. The eventual decision was to opt for a questionnaire designed for 14 and 16 year olds, but which also contained additional questions only answered by 18 and 20 year olds to whom the questionnaire was sent by post.

Because the majority of questionnaires were completed in schools, and because headteachers were (for the most part) prepared to allow their pupils to answer questions without prior consultation with parents, the team had to express due regard for what headteachers would feel was ethical Questions had to ask for information without being over-intrusive in the realm of family affairs, for example Pilot trials and consultation showed the team that headteachers could sanction balanced questions on attitude to drugs, under-age drinking, vandalism and so on, but not direct questioning about participation in activities in the context in which the questionnaire was presented. The end products reveal the team's concern to explore a number of dimensions.

1.6.1 Biographical data were required to enable us to break down the analysis by age and sex. Names were not always forthcoming, which will limit the extent to which all respondents can be followed up individually. Postcodes were asked for in the secondary questionnaire to leave open the option at a later stage of linking the project files with the ACORN database of wider social data derived from household census material.

1.6.2 Family composition was of interest from a number of perspectives. Not only did we wish to check that our sample was reasonably representative in terms of number of nuclear, single-parent, reconstituted families and so on in national terms, but analysis can also cross-tabulate family type and structure with, for example, the degree and type of participation in leisure activities, the income available to the child, with social attitudes and so on.

1.6.3 The socio-economic status of households was an essential piece of information if the team were to be able to verify the representativeness of the sample. Considerable problems were experienced at the pre-pilot and pilot stages not just with the younger but also the older cohorts not knowing or having only a vague knowledge of what their parents did for a living. This was eventually covered by having fieldworkers very carefully briefed to explain to children exactly what was required and to check answers. A complex and detailed system of occupation coding based on the Registrar General's 1981 coding list was used to cover the wide variety of job descriptions given by children. A validity check on fieldworkers' transcriptions of these was carried out. Approximately 6% of questionnaires were either uncoded, due to lack of information from the child, or mis-coded by the fieldworker. For the purposes of the analysis these occupation codes were transliterated both into the usual categories used by the Registrar General and into those used by the 1981 Census (see Appendix A).

1.6.4 Religious affiliation and degree of involvement or attachment to organised church groups was also measured. This information is significant in cross-tabulation with degree of involvement in many casual leisure activities and also in relation to social attitudes and values

1.6.5 General leisure activities were explored on the basis of frequency of participation The categories of leisure activities were derived from compilations of the most frequently pursued activities in the pilot study at each cohort. Questions relating to attitudes to leisure attempted to explore the perceived division between work and leisure and the individual locus of control with relation to leisure. For the secondary schoolchildren the pilot study had highlighted the significant inroads into non-school time by part-time or weekend jobs, and this is also explored. A further question related to perception of neighbourhood leisure facilities.

1.6.6 Sports participation was examined along similar lines to general leisure activities, looking at (a) participation rates (% of people involved), and (b) frequency of participation (number of times an activity was engaged in) for a variety of sports which had figured prominently in the pilot answers The intention was both to be able to provide participation data at this level and then to group activities into sport-types for the purposes of analysis. Degree of sport involvement is also measured by observing the percentage involvement in school teams/clubs and non-school leagues, teams or clubs. A further question related to retrospective involvement in teams, accepting the fact that data on this topic will be particularly influenced by the teachers' industrial action in schools at the time of the survey. Reasons for joining/playing in teams and for ceasing that activity are explored Projections for future sport involvement and current sports attitudes are also examined.

1.6.7 Personal income and spending are of direct relevance in many childrens' leisure lives, both because possessing money enables them to buy entrance or equipment for a variety of activities, but also conversely because the need to earn money often disbars children from school team commitments and other leisure activities. Patterns of children's spending can be misleading, as one has no indication of the level and type of parental support of a child's activities and interests Attempts to discover the latter in the pilot study proved too complex and time-consuming and were reluctantly jettisoned for the main survey.

1.6.8 Friendship patterns are explored at some length. The degree of orientation to peers and/or family seems to have considerable significance for the type of leisure activity pursued Measures of the pressures to conform to a peer group norm are included Lloyd (1985) and Sebald (1981) provided the model for questions on adolescent concepts of popularity and unpopularity, but the actual items were constructed on the basis of pilot work with Aberdeen children.

1.6.9 Self esteem and self perception are important indicators of mental health. Adolescence is notoriously a period for identity, a gradually developing ability to see self through the eyes of others Interestingly, these questions were the part of the questionnaire most enjoyed by the sample young people.

1.6.10 Male/Female stereotypes are explored in a series of attitude statements with which young people have to indicate their agreement or disagreement. This was adapted from Ditkoff (1979).

1.6.11 Mental health is assessed using a standardised 12-item General Health Questionnaire (GHQ) test developed by Goldberg (1972). The GHQ is a screening test for detecting minor psychiatric disorders. GHQ12 is an accepted abbreviated form of the original 60-item version devised by Goldberg. Items consist of a question asking whether the respondent has recently experienced a particular symptom, or item of behaviour rated on a four-point scale. The scoring method used here is the Likert method; Banks et al (1980) have shown that the Likert scoring provided a more acceptable distribution of scores than the original binary method when used in parametric statistical analyses. The use of the GHQ instrument here is seen as of twofold interest. The concept of 'positive mental health', discussed by Argyris (1951), Allport (1958) and Jahoda (1958) and developed by Kornhauser (1965), refers to "behaviours, attitudes and feelings that represent an individual's level of personal effectiveness, success and satisfaction.".
Use of the GHQ enables the project team to explore the validity of this concept in relation to other attitudinal behaviours of young people and to their pattern of activity and lifestyles. The GHQ scores also used in a more traditional clinical way in data pertaining to the post-school cohorts and their occupational status. Various studies (for example, Marsden and Duff, 1975 and Banks and Jackson, 1982) have described the negative psychological effects of unemployment.

1.6.12 Academic attainment is simply assessed by asking for examination passes, though this question will have little relevance for any other than the oldest two cohorts. For the rest, attitudes to school are tested in an instrument which consists of statements which require the subject to indicate their level of agreement or disagreement Academic and occupational ambitions are also elicited

1.6.13 Attitudes to work include attitudes to the state of being unemployed. Question 53 of the questionnaire is designed to establish locus of control for the respondent Siddique and D'Arcy (1984) and Siegel and Griffin (1984) have explored the role of locus of control in protecting adolescents from the health consequences of stresses imposed by the school context, by peer pressure and by unemployment. General attitudes to work are explored. Those who are unemployed or on YTS are further questioned about their attitudes to job-seeking.

1.6.14 Physical fitness is explored by means of a height/weight ratio and a general question about fitness. More specific questions about fitness, level of aerobic activity, histories of ill-health were contemplated at the pilot stage, but it was felt that other surveys of young people were already exploring this area most effectively and that further duplication was unnecessary. Attitudes to health and fitness were explored on an agree/disagree response to statements to enable some comparative measure of the extent to which sport, physical activity and leisure life generally were seen as contributing to a healthy lifestyle.

1.6.15 Social attitudes are explored on similar agree/disagree attitude scales. A model for this type of question was that developed by Lloyd (1985) and Lerner et al (1975), but the actual items were established after discussion and questionnaire pilot work in Aberdeen schools. Direct questioning about drinking, drug-taking and degree of delinquent activity was avoided for the reasons previously noted.

1.6.16 Saliences or priorities enable us to put our direct questions about sport and leisure activities into some perspective. The risk is that the research is exploring areas of particular interest to the researchers and their funding bodies without having any notion of the overall importance of that area in young people's lives.

SECTION II THE SUBJECTS: YOUNG PEOPLE IN 1987

2.1 Introduction

The present chapter offers a descriptive account of the four main cohorts used in the study of young people's leisure and lifestyles. Basic demographic details are given, in addition to information about social class of household, household composition, religious affiliation and church attendance, marital status (where appropriate), activity status (school, work and unemployed) and geographical location.

2.2 Description of sample

2.2.1 Age and gender

As Table 2.1 shows, the achieved sample of young people overall is weighted towards the younger age groups, those aged between 14 and 16 years, when compared with the population of Scottish youth found in the 1981 Census. This might be expected given the likelihood of a greater response rate among younger people still at school to a school-based questionnaire, against a post-school sub-sample approached through a postal survey. A more representative sample was however achieved with respect to gender.

TABLE 2.1: Composition of the Scottish Sample by Gender and Age Group

	YP SAMPLE (N=6,087)				SCOTLAND * (N=705,172)			
AGE GROUP	Female N=3054		Male N=3033		Female N=345232		Male N=359940	
	N	%	N	%	N	%	N	%
14 years	1028	17	1039	17	85,204	12	89,678	13
16 years	1147	19	1173	19	88,897	13	92,844	13
18 years	503	8	471	8	87,823	12	91,017	13
20 years	376	6	350	6	83,308	12	86,401	12

* 1981 Census figures

2.2.2 Social class of household

Enquiries were made to establish the social class of household in which the young people resided. The Registrar General's socio-economic categories were used for this purpose and refer to the occupation of the male (father or stepfather) head of household, where a male head of household resides. The categories were transliterated into the equivalent 1981 Census groups (see Appendix A).

The social class groups are as follows. Professional (1), Intermediate (2), Skilled Non-manual (3N), Skilled Manual (3M), Semi-skilled (4) and Unskilled (5).

TABLE 2 2. Social Class of Head of Household by Age Group

AGE GROUP	N	SOCIAL CLASS 1 %	2 %	3N %	3M %	4 %	5 %
14 years	1505	8	25	10	37	16	4
16 years	1702	9	28	9	34	16	4
18 years	725	9	28	8	34	15	5
20 years	504	8	26	9	38	16	4
ALL YP	4436	9	27	9	35	16	4
Scotland*		5	19	10	38	19	8

* 1981 Census figures, N = 1,030,614

As Table 2.2 shows the distribution of sample households across the social classes mirrors that found among young people in Scotland as a whole.

The young people in the post-16 sample were also asked about their own current activity or occupational status. Six categories were available. Full-time job (FT), Part-time job (PT), School (SCH), Further Education (FED), Unemployed (UNEM), YTS or similar scheme (YTS).

TABLE 2 3 Activity Status by Age Group

AGE GROUP	N	ACTIVITY STATUS FT %	PT %	SCH %	FED %	UNEM %	YTS %
16 years	2320	2	6	84	2	5	0
18 years	974	47	3	4	13	21	15
20 years	726	52	5	0	25	18	0

As Table 2 3 shows, among the two older age cohorts comprising young people who clearly were beyond the minimal school leaving age, a variety of statuses were to be found. Most of the young people in these groups were in some form of employment, primarily in full-time jobs, although a sizeable proportion of the 17-18 year old cohort were in government schemes covered by the YTS programme. Of significance too were the numbers in both the older age cohorts who were unemployed; more than a fifth of the young people aged 17-18 years being in this position. Finally, although beyond the minimal school leaving age, a continuing interest in full-time education was evident among the older age cohorts, with almost a quarter of those aged 19-20 years pursuing some form of further education at college or university.

2.2.3 Household composition

The study sought to provide information on the type of household and family in which young people live. The diversity of such living arrangements was hypothesised to be associated with the different lifestyles enjoyed by the sample.

Within the sample, the 'traditional' nuclear family with brothers and sisters was the most commonly found household type, across the six cohorts, although the incidence of this type of household declined with (greater) age. The latter finding was expected and is consistent with older brothers and sisters leaving the household as they age and find independence. Indeed the higher percentage of young people in the older age cohorts living in nuclear households without any brothers or sisters would support such a proposition.

TABLE 2 4. Household Composition by Age Group

HOUSEHOLD COMPOSITION	AGE GROUP 14 yrs	16 yrs	18 yrs	20 yrs
N	2067	2319	972	726
	%	%	%	%
Extended	3	2	2	2
Nuclear + Siblings	75	72	67	57
Nuclear _ Siblings	10	12	15	18
Single Mum - Siblings	8	8	8	8
Single Mum + Siblings	2	3	3	2
Single Dad - Siblings	1	1	1	1
Single Dad + Siblings	1	1	1	1
Other*	1	1	4	10

* Households comprising combinations of grandparents, aunts, uncles etc In addition, for the older age groups, a small percentage (3% N=38) were married.

Twelve percent of the young people lived in households with a single parent, a figure slightly below the national average of 13% for one parent families in Scotland. The prevalence of single parent families headed by a lone mother, found among the young people interviewed, is again consistent with national trends.

The number of young people in the sample who were the 'only child' in a household (13% in nuclear households and 3% in single parent households) was below what might have been expected given the national figure (for nuclear households) of 19%. Regional variations may however account for at least part of the difference found among the sample, the sample being drawn from Scotland alone.

2.2.4 Geographical region

The sample was devised to be representative of Scottish youth and as such was scattered over the majority of regions in Scotland

TABLE 2 5 Region of Residence by Age Group

REGION OF RESIDENCE	AGE GROUP 14 yrs	16 yrs	18 yrs	20 yrs
N	2067	2320	974	726
	%	%	%	%
Western Isles	1.3	1.6	1.0	1 0
Central	4.2	4.4	4.8	5.6
Dumfries & Galloway	2.1	1 9	2.8	3 0
Fife	11 1	11 6	12.1	8 1
Grampian	7.5	6 6	4.1	3.9
Highland	6 0	8 1	8.7	7 2
Lothian	13.0	15 3	19.9	19.1
Orkney & Shetland Isles	2 4	2 7	1 0	0 3
Strathclyde	47 6	43.3	41 2	44.1
Tayside	4.7	4 6	4 3	7 7

As Table 2.5 shows, Strathclyde region was the most heavily sampled region, a factor which reflects the sprawling area which the region covers and the concentration of population therein. Only the Borders region was unrepresented.

2.2.5 Religion

Table 2.6 shows how if parents' religion can be taken as characterising the household, then the majority of young people live in families which are, nominally at least, Christian in particular Church of Scotland (41%) and Roman Catholic (24%). Eastern religions, such as Islam and Hinduism, were little reported. The number whose parents had no religious affiliation (17%) and those who did not know if their parents had any religious affiliation (10%) suggest that for a significant minority of young people, religion plays a small, or insignificant role in family life

TABLE 2 6 Parents' Religion - Secondary Sample* by Age Group

PARENTS' RELIGION	AGE GROUP 14 yrs	16 yrs	18 yrs	20 yrs	ALL YP
N	1973	2201	945	709	5828
	%	%	%	%	%
Church of Scotland	31 7	40 5	50 9	55 6	41 1
Baptist	1 7	1 2	1 4	1.3	1.4
Free Church	1 8	1.5	1.6	1 7	1 6
Catholic	26 0	23 9	22 3	22 7	24 2
Episcopal	1 0	1 7	1.9	0 6	1 3
Islam	0 5	0 2	0.5	0 1	0 3
Hinduism	0.1	0	0.1	0	0 1
Jewish	0	0	0 1	0	(1)+
Other	2 2	3.1	3 7	2 7	2.8
None	20.2	18 0	13 4	12 6	17 3
Don't Know	15 0	9.7	4 0	2 8	9.7

+ Figure in parentheses refers to actual number and not percentage, as percentage value was less than 0 1%

Further evidence of the marginal role of organised religion in the lives of the young people can be seen from numbers who report attending a church service at least once per month.

TABLE 2 7: Monthly Church Attendance by Age Group

AGE GROUP	N	FREQUENT CHURCH ATTENDANCE %
14 years	2016	40 3
16 years	2268	30.8
18 years	957	26 6
20 years	716	25.4
ALL YP	5957	32 7

As Table 2.7 shows less than a third of the young people interviewed were frequent church attenders. Those in the older age cohorts 17-18 years and 19-20 years being less likely than those in the younger age groups to attend church regularly.

Participation in church services however was not simply age related, but was associated with particular beliefs.

TABLE 2 8. Monthly Attendance at Religious Service by Parents' Religion

PARENTS' RELIGION	ALL YP (N=5828) %
Church of Scotland	24
Baptist	63
Free Church	32
Catholic	76
Episcopal	46
Moslem	65
Hindu	33
Jewish	-
Other	45

Table 2.8 shows how more than three quarters of the young people from Catholic households were frequent church attenders, while less than a quarter of the young people with parents belonging to the established church, the Church of Scotland, were equally committed. Apart from the Islam faith, the remaining religions attracted fewer than half of the young people whose parents were nominally church members.

SECTION III DATA FILE VARIABLES

3.1 Dictionary

This section provides the dictionary details of the data file variables. Further information is available in section 3.2 for those variables marked with an *

3.1.1 Record 1

	Q280	16	Your wages allow you to keep up with fashion and to go out with friends· as Q272
	Q281	17	Work gives the day structure: as Q272
	Q282	18	Work is a place where you meet and make friends· as Q272
	Q283	19	Work makes you appreciate leisure time more as Q272
55	Q284 *	21-22	Months unemployed. number
56	Q285 *	23	I can't be bothered looking for a job: 1 - Strongly disagree 2 - Disagree 3 - Don't know 4 - Agree 5 - Strongly agree
	Q286 *	24	I'm looking for a job as hard as I've ever done: as Q285
	Q287 *	25	It's not worth chasing after a job nowadays. as Q285
	Q288 *	26	I'm looking for a job but only if it pays more than the dole: as Q285
	Q289 *	27	I'm looking for a job but not any old job. as Q285
	Q290 *	28	I'm staying on the dole, but I'll do odd jobs for 'pocket money': as Q285

57	Q291	29	Weight description 1 - I weigh less than most people of my age 2 - I weigh about the same as most people of my age 3 - I weigh more than most people of my age 4 - I weigh much more than most people of my age
58	Q292	30	Height description 1 - I am shorter than most people of my age 2 - I am about the same height as most people of my age 3 - I am taller than most people of my age 4 - I am much taller than most people of my age
59	Q293	31	Fitness description 1 - I am very unfit 2 - I am fairly fit 3 - I am very fit
60	Q294	33	Your health is something you inherit from your family. 1 - Strongly disagree 2 - Disagree 3 - Agree 4 - Strongly agree
	Q295	34	Good health has most to do with an attitude of mind as Q294
	Q296	35	Our health and fitness is the doctor's responsibility. as Q294
	Q297	36	It's up to all of us to lead the sort of life that makes you fit: as Q294
	Q298	37	Good health and fitness are just a matter of luck for most of us· as Q294
	Q299	38	What you eat and whether you exercise determines how healthy you are. as Q294
	Q301	39	You can't be fit and healthy if you're living in cold, damp housing conditions. as Q294
	Q302	40	Healthy eating costs too much· as Q294
	Q303	41	Health is something you only have to worry about when you get older. as Q294
	Q304	42	If I keep fit and healthy now I'll live longer: as Q294
	Q305	43	If you're going to die anyway, what difference does it make if you're fit and healthy as Q294

61	Q306	45	Too many young people get drunk just to try and look big amongst their friends· 1 - Strongly disagree 2 - Disagree 3 - Don't know 4 - Agree 5 - Strongly agree
	Q307	46	It is hard to find a place to meet and talk where there isn't drink on offer as Q306
	Q308	47	A lot of kids drink stupidly, it's just a phase - they soon sort themselves out as Q306
	Q309	48	It's hard not to drink if all your friends do as Q306
	Q310	49	If parents drink, so will teenagers as Q306
62	Q311	51	Drugs are a prop for people who can't cope 1 - Strongly disagree 2 - Disagree 3 - Don't know 4 - Agree 5 - Strongly agree
	Q312	52	Drugs and glue can help you escape from a boring life when there's nothing to do· as Q311
	Q313	53	All drugs are too dangerous to experiment with as Q311
	Q314	54	Sniffing glue is just a lark - it doesn't do you any harm. as Q311
	Q315	55	Drugs destroy people's lifes and families: as Q311
	Q316	56	It's O K. to take drugs to relax at a party or disco as Q311
	Q317	57	Young people take drugs out of curiosity as Q311
63	Q318	59	I like having a laugh but I'm not keen on getting into trouble· 1 - Strongly disagree 2 - Disagree 3 - Don't know 4 - Agree 5 - Strongly agree
	Q319	60	Life is so short that having a good time is more important than anything as Q318
	Q320	61	Some people deserve to have their belongings stolen or vandalised. as Q318
	Q321	62	It always pays to be honest as Q318
	Q322	63	The Church is the best authority to decide on matters of right and wrong as Q318
	Q323	64	The police are unfair in their treatment of teenagers as Q318

Q324	65	What teenagers do and how they dress outside their home is their own business as Q318
Q325	66	Moat parents ought to be stricter with their children as Q318
Q326	67	Young people get into trouble on impulse - for excitement and thrills as Q318

3.1.8 Record 8

QUESTION NUMBER	VARIABLE CODE	COLUMN NUMBER	VARIABLE LABEL AND VALUE LABELS
CASE	QNUM	1-5	Questionnaire number
TYPE	TYPE	6	Type of questionnaire S - Secondary
RECORD	RECORD	7	Record number. 8
64	Q327	8	I often quarrel with a brother/sister. 1 - Very untrue 2 - Untrue 3 - Uncertain 4 - True 5 - Very true
	Q328	9	My parents have strong views about my appearance as Q327
	Q329	10	I get on well with my mother: as Q327
	Q330	11	I get on well with my father. as Q327
	Q331	12	My parents want to know where I go in the evenings. as Q327
	Q332	13	My parents disapprove of some of my male friends. as Q327
	Q333	14	My parents disapprove of some of my famale friends. as Q327
	Q334	15	My parents generally support and encourage my leisure activities. as Q327
65	Q335	17	Choosing how to dress· 1 - Experts 2 - Pop stars 3 - Sports stars 4 - School/work mates 5 - Parents
	Q336	18	Choosing a job as Q335
	Q337	19	Choosing what to do in your spare-time. as Q335
	Q338	20	Choosing a boy/girl friend as Q335
	Q339	21	Keeping healthy. as Q335
	Q340	22	Sorting out problems with alcohol or drugs: as Q335
	Q341	23	Answering questions about sex· as Q335

66	Q342	25	Having a job you like is 1 - Not at all important 2 - Not very important 3 - Fairly important 4 - Very important
	Q343	26	To be earning money is as Q342
	Q344	27	Clothes, hairstyle, appearance are as Q342
	Q345	28	Being treated as a grown-up is as Q342
	Q346	29	Dancing, discoes are as Q342
	Q347	30	Having a boy/girl friend is as Q342
	Q348	31	Casual, relaxing leisure is as Q342
	Q349	32	Pop/rock music is as Q342
	Q350	33	Starting work as soon as possible is as Q342
	Q351	34	Going to college or university is as Q342
	Q352	35	Lots of organised clubs/activities are. as Q342
	Q353	36	Having friends to go around with is as Q342
	Q354	37	Sport is. as Q342
	Q355	38	Your family is. as Q342
	Q356	39	Having a good time while still young is: as Q342
	Q357	40	Having your own transport (car, bike) is as Q342
	Q358	41	Having your own flat is as Q342

3.2 Extra information

This section deals with a more detailed explanation of those variables marked with an *.

3.2.1 QNUM

In some cases (see below) a questionnaire number was allocated to more than one individual. In order to distinguish between individuals, each duplicate questionnaire number (QNUM) was given a new set of unique numbers

Duplicate questionnaire numbers (QNUM) are as follows

QNUM	Frequency	New QNUM	QNUM	Frequency	New QNUM
00000	3	10001-3	4790	2	10056-57
18	2	10004-5	4975	2	10058-59
240	2	10006-7	5001	2	10060-61
343	2	10008-9	5064	2	10062-63
466	2	10010-11	5234	2	10064-65
692	2	10012-13	5334	2	10066-67
972	2	10014-15	5467	2	10068-69
1212	2	10016-17	5598	2	10070-71
1409	2	10018-19	5646	2	10072-73
2079	2	10020-21	5725	2	10074-75
2397	2	10022-23	6048	2	10076-77
2594	2	10024-25	6055	2	10078-79
2745	2	10026-27	6061	2	10080-81
2840	2	10018-29	6224	2	10082-83
3215	2	10030-31	6234	2	10084-85
3323	2	10032-33	6511	2	10086-87
3674	2	10034-35	6651	2	10088-89
3712	2	10036-37	6684	2	10090-91
3747	2	10038-39	6890	2	10092-93
3751	2	10040-41	7128	2	10094-95
3784	2	10042-43	7378	2	10096-97
4000	2	10044-45	7393	2	10098-99
4161	2	10046-47	7497	2	10100-101
4586	2	10048-49	7561	2	10102-103
4663	2	10050-51	7938	2	10104-105
4664	2	10052-53	8500	2	10106-107
4709	2	10054-55	99999	3	10108-110

3.2.2 Q2

The day of birth may be incorrect, i.e. lie outwith the range of 1 to 31, but these respondents were not excluded from the database.

3.2.3 Q3

The month of birth may be incorrect, i.e. lie outwith the range of 1 to 12, but these respondents were not excluded from the database.

3.2.4 Q4
Only those respondents with a year of birth lying between 1967 and 1974 were included in the database

3.2.5 Q21
Only those respondents who had left school answered this question.

3.2.6 Q22
Only those respondents who had left school answered this question.

3.2.7 Q23, Q24, Q25
The occupation codes were initially based on the Registrar General's listing and were subsequently converted to the occupation codes used in the 1981 Census (see Appendix A).

3.2.8 Q85
Only those respondents who were still at school answered this question.

3.2.9 Q86
Only those respondents who said 'yes' to Q85 answered this question.

3.2.10 Q88
Only those respondents who said 'yes' to Q87 answered this question.

3.2.11 Q116, Q117, Q118, Q119
Only those respondents who were still at school answered these questions.

3.2.12 Q120, Q121
Only those respondents who had left school answered these questions.

3.2.13 Q284
Only those respondents who were unemployed answered this question.

3.2.14 Q285, Q286, Q287, Q288, Q289, Q290
Only those respondents who were either unemployed or on a YTS or similar scheme answered these questions.

SECTION IV COMPUTED VARIABLES

4.1 Dictionary

This section comprises the computed variables and their value labels The transformations and/or computations are detailed where relevant

VARIABLE CODE	VARIABLE LABEL AND VALUE LABELS
AGE	Age: 13 - 13 years 14 - 14 years 15 - 15 years 16 - 16 years 17 - 17 years 18 - 18 years 19 - 19 years 20 - 20 years

```
. COMPUTE AGE = 0
 .IF (Q4 EQ 74) AGE = 13
  IF (Q4 EQ 73) AGE = 14
..IF (Q4 EQ 72) AGE = 15
. IF (Q4 EQ 71) AGE = 16
  IF (Q4 EQ 70) AGE = 17
..IF (Q4 EQ 69) AGE = 18
. IF (Q4 EQ 68) AGE = 19
 .IF (Q4 EQ 67) AGE = 20
```

AGEGP	Age group: 1 - 13 to 14 year olds 2 - 15 to 16 year olds 3 - 17 to 18 year olds 4 - 19 to 20 year olds
ANYGP	Number of any sport ever played, grouped: 1 - 1 to 3 2 - 4 to 7 3 - 8 to 11 4 - 12 to 15 5 - 16 to 25

```
RECODE ANYS (1 THRU 3 = 1) (4 THRU 7 = 2) (8 THRU 11 = 3)
(12 THRU 15 = 4) (16 THRU 25 = 5) (ELSE = SYSMIS) INTO ANYGP
```

ANYS	Plays any sport ever

```
..COUNT ANYS = Q60 TO Q84 (2 THRU 4)
```

ANYS2 Plays any sport ever: 1 - Yes
2 - No

```
RECODE ANYS (1 THRU HI EQ 1) (ELSE EQ 2) INTO ANYS2
```

AREA School area: Q5 (school) was recoded from the alphanumeric form into an interger number For reasons of confidentiality, the individual schools have not been identified

NOTES

* These occupation codes were deleted as there was too much overlap between the occupation codes' social class groups.

** Transfer operator code not listed in the Census occupation codebook. The 3M code was allocated.

EXECUTIVE DECISIONS

Where there was a certain amount of overlap between social class groups for the occupations listed in the Registrar's General codebook, an executive decision was taken to allocate the occupations to one or other of the 1981 Census social class groups. The following list indicates which occupations are also included in the 1981 Census social class groups.

1	Includes 3M occupations
2	Includes 1 occupations
3	Includes 1 occupations
4	Includes 4 occupations
5	Includes 3M occupations
6	Includes 3M occupations
7	Includes 1 occupations
8	Includes 3M occupations
9	Includes 4 occupations
10	Includes 3N, 4 occupations
11	Includes 3M occupations
12	Includes 4 occupations
13	Includes 3M occupations
14	Includes 4 occupations
15	Includes 3N occupations
16	Includes 1 occupations
17	Includes 4 occupations

18	Includes 3N occupations
19	Includes 3M occupations
20	Includes 3N occupations
21	Includes 2 occupations
22	Includes 3M occupations
23	Includes 4 occupations
24	Includes 4 occupations
25	Includes 2 occupations
26	Includes 4 occupations
27	Includes 1 occupations
28	Includes 1 occupations
29	Includes 1 occupations
30	Includes 1 occupations
31	Includes 1 occupations
32	Includes 2 occupations

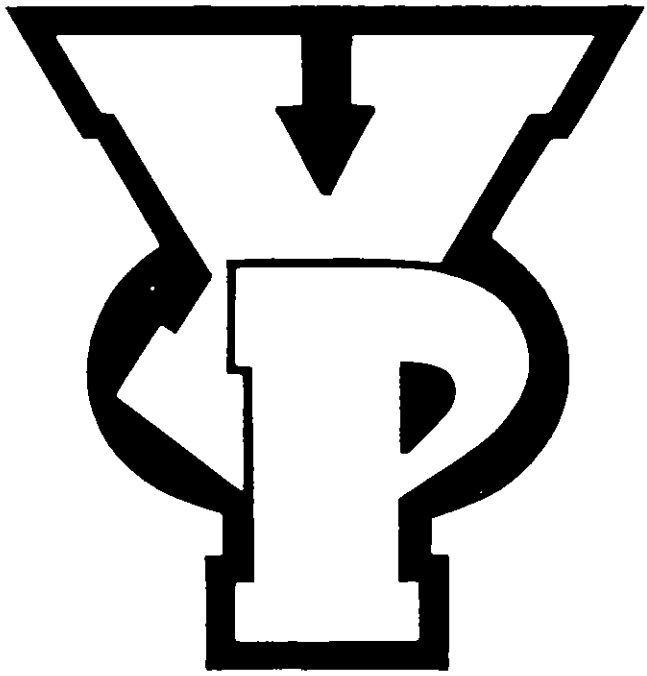
YOUNG PEOPLE'S LEISURE AND
LIFESTYLES IN MODERN SCOTLAND

8795

APPENDIX B
COPY OF QUESTIONNAIRE



Young People's Leisure and Lifestyles in Modern Scotland

HOW TO ANSWER

We hope this questionnaire will let you express your feelings about what it is like to be a young person in Scotland today

We have tried to make the questions easy and quick for you to answer

For most of the questions there is a list of possible answers, with a box printed beside each one. Please choose your answer and circle the box or put a tick in the box

For example,

Have you played any team sports in the last year?

Y

N

If none of the answers exactly fits the answer you want to give, choose the one that comes nearest. If you want, you may write comments beside the question, but please always tick an answer as well

Ignore the numbers in the boxes, and in the right hand margin They are just there to help us

The questionnaire is completely confidential No-one in school or at home will see any of it Only people on the research team will handle it.

We would like you to fill in your name and address on the back sheet We hope that in two or three years time there will be a follow-up to see what things have changed

Thank you for your help in answering this questionnaire
If you would like to tell us more in your own words, please write on the inside of the back cover

A B O U T Y O U

For office use only

1. Are you male? [M]

   female? [F] 8

   (circle one box only)

2 When were you born? Write it in the boxes below

   (e.g. 14th October 1973 would be [1|4] [1|0] [7|3])

   date [|] 9 10 month [|] 11 12 year [|] 13 14

3 If you are still at school, print the name of your school below

   .. . . [|] 15 16

4. If you have left school, print the name of your last secondary school below

   .. . . [|] 15 16

5 If you know the postcode for your house, print it in the space below.

   . . .. [| | | | | |] 17 23

6 Please tick which people live at home with you

Mother	☐ 25	Father	☐ 26
Stepmother	☐ 27	Stepfather	☐ 28
Grandparents	☐ 29	Brother(s)	☐☐ 30 31 (say how many)
		Sister(s)	☐☐ 32 33 (say how many)
Your wife	☐ 34	Your husband	☐ 35
Your girlfriend	☐ 36	Your boyfriend	☐ 37
		Your children	☐☐ 38 39 (say how many)
		Your partner's children	☐☐ 40 41 (say how many)

IF YOU ARE STILL AT SCHOOL PLEASE GO ON TO QUESTION 10

IF YOU HAVE LEFT SCHOOL PLEASE ANSWER QUESTIONS 7 TO 9 BELOW AS WELL

7 Are you (circle one box only)

married	1	engaged	2
divorced	3	with steady boy/girl friend	4 43
none of these	5 43		

8 Are you at present (circle one box only)

in a full-time job	1	in a part-time job	2
still at school	3	in further education (college, university)	4
unemployed	5 44	on a YTS scheme	6 44

For office use only

9. If you have a **full-time** job please tell us what you do
Print the name of it below

. . ..

46 48

10 If your father (or stepfather) has a job, please tell us what he does (**If unemployed, write 'unemployed'**)

. . .

49 51

11 If your mother (or stepmother) has a **full-time paid** job, please tell us what she does Print the name of it below

.. . .

52 54

12 Did either of your parents do extra studying after they left school, such as going to university or technical college? (**circle one box only**)

Yes, mother	1	Yes, father	2
Yes, both mother and father	3	Neither	4
Don't know	5		

55

13 Do **you** attend church (or temple or mosque) regularly (at least once a month)? (**circle one box only**)

Yes	Y
No	N

56

14 Please circle one of the boxes below to describe the church or religious group to which your parents belong

Church of Scotland	[1] 61	Baptist	[2] 61
Free Church	[3] 61	Catholic	[4] 61
Episcopal Church	[5] 61	Moslem	[6] 61
Hindu	[7] 61	Jewish	[8] 61

Another church or religion	[9] 61
No church at all	[A] 61
Not sure/don't know	[B] 61

YOUR LEISURE

For office use only

15 In the list below we have included different sorts of activities that you might take part in **at home** **Ring one number in each row** to show how often you do the following things

Repeat cols 1-6

[2]
7

At home	Two/Three times a week	Once/twice a fortnight	Few times a year	Never	
Watch TV	4	3	2	1	Col 8
Listen to music	4	3	2	1	Col 9
Play with toys or video games	4	3	2	1	Col 10
Read books for pleasure	4	3	2	1	Col 12

Sailing	4	3	2	1	Col 69

For office use only

Repeat Cols 1-6

18 Do you play now in a school sports team or take part in activities where you compete against other schools? (circle one of the boxes) [3] 7

Yes [Y]

No [N] 8

IF YOU ANSWERED 'NO' GO ON TO QUESTION 20

IF YOU ANSWERED 'YES', PLEASE ANSWER QUESTION 19 TOO

19 Which of these reasons comes closest to explaining why you play for a school team (circle one box only)

My parents like me to do it [1]

My teacher pressured me into doing it [2]

I'm just good at the sport and I like playing it [3]

My friends are in the team and we have a good time together [4]

I like training and being fit [5]

It's nice to be really good at something [6]

I like competitions [7]

People respect you a bit for doing it [8]

I like having a strip/uniform to wear [9]

None of these reasons [0] 9

20 Did you ever in the last two years play for a school sports team which you've since given up? (circle one box only)

Yes [Y]

No [N]
10

IF 'NO', PLEASE GO ON TO QUESTION 22

IF 'YES', PLEASE ANSWER QUESTION 21 TOO

21. Why did you give up playing in the school team? Which of the reasons below comes closest to explaining why. (circle one box only)

I was no longer good enough [1]

I had no time for practices [2]

I wasn't interested any more [3]

I disliked the people involved [4]

My friends stopped playing [5]

I left school [6]

Difficulties with transport [7]

Other things seemed more important [8]

Teachers' strike stopped teams [9]

None of these reasons [0]
11

22 Do you now play any sports for fun with a team or club outside school (circle one box only)

Yes [Y]

No [N]
12

For office use only

23 Do you ever take part in sports competitions, leagues or events in teams or clubs outside school? (circle one box only)

Yes [Y]

No [N]
13

24 Try to think what you will be like in three years time Say which of the following most closely resembles what you think might be true for you (circle one box only)

I'll be doing more sport to keep fit [1]

I'll be doing more competitive things in sport [2]

I'll have given up all sport except things for fun [3]

I'll be doing much the same amount of sport as I am now [4]

I'm more likely to be doing different sports for relaxation [5]

I won't be doing any sport, there'll be plenty of other things to do [6]
14

For office use only

25 Here is a list of things people have said about sport
Say whether you agree or disagree with them
Circle only one number in each row.

	Agree	Don't Know	Disagree	
Sport gives you a healthy, fit body	3	2	1	Col 15
Sport keeps you mentally fit and alert	3	2	1	Col 16
Sport is something everyone can enjoy	3	2	1	Col 17
There's no point in doing sport unless you've got a natural talent	3	2	1	Col 18
You give up too much if you go on with sport once you leave school	3	2	1	Col 19
It's a shame that employers don't allow time and facilities for sport	3	2	1	Col 20
Sport is a good way of meeting and keeping up with friends	3	2	1	Col 21
Sport is only for those who can afford it	3	2	1	Col 22

YOUR LEISURE

For office use only

26 Here are some things young people have said about leisure time Read each one and circle one number in each row to show whether or not you agree with the statement

	Agree	Don't Know	Disagree	
I've got too much spare time	3	2	1	Col 24
I often get bored in my spare time	3	2	1	Col 25
I never seem to have enough spare time to do all the things I'd like	3	2	1	Col 26
I'm too busy doing jobs at home to have 'spare time'	3	2	1	Col 27
I'd rather be left alone to organise myself in my spare time	3	2	1	Col 28
I like being organised into action in my spare time by others	3	2	1	Col 29
Leisure activities should teach you the skills you'll need in later life	3	2	1	Col 30
Leisure time is time to 'switch off' completely from work	3	2	1	Col 31
Work time and leisure time are quite separate for me	3	2	1	Col 32
My work and leisure seem to merge into one another	3	2	1	Col 33

27. Which things would you like to see improved in your neighbourhood to make leisure time better for people of your age?
(tick as many boxes as you need to)

Better sports facilities for outdoor team games	☐	35
Better facilities for indoor sports e g squash, swimming etc.	☐	36
Coaching in new sports/activities for people of my age	☐	37
Better transport within local area	☐	38
Better places to just meet and talk	☐	39
More organised clubs and activities	☐	40

IF YOU ARE AT SCHOOL, PLEASE ANSWER QUESTIONS 28–31 BELOW

IF YOU HAVE LEFT SCHOOL PLEASE GO ON TO QUESTION 32

28. How much money do your parents or other people in your family give you on average each week to save or spend?

Include any money they give you regularly which is for clothing, travel or meals.

If they give you money as you ask for it, please try to work out how much this comes to most weeks. (circle one box only)

None	[1]	Under £2	[2]
£2 - £4 99	[3]	£5 - £7.99	[4] 42
£8 or more	[5] 42		

29 Do you have a spare time job during term-time? (circle one box only)

No	[1]	Yes, at weekends only	[2]
Yes, in the week	[3] 43	Yes, both weekdays and weekends	[4] 43

30 How much time does your job usually take up each week? (circle one box only)

Less than 3 hours	[1]	3 - 6 hours	[2]
More than 6 and up to 9 hours	[3]	More than 9 and up to 12 hours	[4]
More than 12 and up to 15 hours	[5] 44	More than 15 hours	[6] 44

31 How much money do you earn on average each week through part-time work during term-time? (circle one box only)

Under £5	1	Between £5 and £7	2
Between £7 and £10	3	Over £10	4

45 45

QUESTIONS 32 TO 33 ARE FOR PEOPLE WHO HAVE LEFT SCHOOL

IF YOU ARE STILL AT SCHOOL, PLEASE GO ON TO QUESTION 34

32 If you are working, unemployed, a student or on YTS, please say approximately how much you get in wages or grant or benefit per week. (circle one box only)

Under £10	1	Between £10 and £20	2
Between £20 and £30	3	Between £30 and £40	4
Between £40 and £50	5	Over £50	6

46 46

33 How much money do you have to spend on your leisure each week (after payments for rent, food, travel to work etc) (circle one box only)

Under £10	1	Between £10 and £20	2
Between £20 and £30	3	Between £30 and £40	4
Between £40 and £50	5	Over £50	6

47 47

34. Say which of the following is true for you (circle one box only)

I get more than enough money for a person of my age	1
I get about enough money for a person of my age	2
I don't get enough money, but I manage	3
I don't get nearly enough money	4

48

35 From the following list choose the two things on which most of the money you have <u>for yourself</u> goes (<u>circle two only</u>)

Records, cassettes	1
Sports kit and equipment	2
Clothes, shoes	3
Make-up, toiletries	4
Entertainment (cinemas, discos, watching sport etc)	5
Alcoholic drinks	6
Food and sweets	7
Cigarettes	8
Book, papers, magazines, comics	9
Savings	A
Toys, games, computer games	B
Presents/cards for family, friends	C
Pencils, pens, notepaper	D
Others	E

51 Which do you think sounds most like what you will do in the future? (circle one box only)

I'll work for a few years, then have a family [1]

I'll keep the same job for my whole career [2]

I'll probably have to switch from job to job [3]

I'll train on the job for better qualifications [4]

I'll spend a lot of time out of work [5]

I'll go to college or university, then take a job [6] 57

52 In choosing a job what things about it do you think are important? Choose your answers from the list below **Tick as many boxes as you wish.**

The job should involve working with your hands [ ] 58

It should involve using your head and need thought and concentration [ ] 59

It should be an outdoor job [ ] 60

It should be well-paid [ ] 61

It should be convenient hours and conditions [ ] 62

The job should involve variety [ ] 63

The job should offer you chances of promotion [ ] 64

It should give you the chance of being in charge of other people [ ] 65

The job should let you be your own boss [ ] 66

It should be a clean job [ ] 67

It should give you the opportunity of helping others [ ] 68

It should not have too much responsibility at first [ ] 69

For office use only

53 Here are some statements young people have made about finding jobs. Say how true or false you think each one is (**circle one number in each row**)

	Very True	Fairly True	Fairly False	False	
No-one can control the job situation, not even the government	4	3	2	1	Col 71
I lack the confidence and ability to get a job	4	3	2	1	Col 72
It's the government's fault that jobs are so difficult to find	4	3	2	1	Col 73
I never try hard enough to get the things I want	4	3	2	1	Col 74

YOU AND WORK

THE NEXT FEW QUESTIONS ARE FOR THOSE WHO ARE UNEMPLOYED OR ON YTS. IF YOU ARE NOT UNEMPLOYED AND NOT ON YTS PLEASE GO ON TO QUESTION 57

55. If you are unemployed now, how long have you been unemployed for?

write in number of months [ ][ ] 21 22

56 Here are some things young people who are unemployed or on YTS have said about looking for jobs. How much do you agree or disagree with these?
(circle one number in each row)

	Strongly Agree	Agree	Don't Know	Disagree	Strongly Disagree	
I can't be bothered looking for a job	5	4	3	2	1	Col 23
I'm looking for a job as hard as I've ever done	5	4	3	2	1	Col 24
It's not worth chasing after a job nowadays	5	4	3	2	1	Col 25
I'm looking for a job but only if it pays more than the dole	5	4	3	2	1	Col 26
I'm looking for a job but not any old job'	5	4	3	2	1	Col 27
I'm staying on the dole, but I'll do odd jobs for 'pocket money'	5	4	3	2	1	Col 28

For office use only

57 Which is the best description of you? (circle one box only)

I weigh less than most people of my age [1]

I weigh about the same as most people of my age [2]

I weigh more than most people of my age [3]

I weigh much more than most people of my age [4]
29

58 Which is the best description of you? (circle one box only)

I am shorter than most people of my age [1]

I am about the same height as most people of my age [2]

I am taller than most people of my age [3]

I am much taller than most people of my age [4]
30

59 Would you say you were generally (circle one box only)

a very unfit person [1]

a fairly fit person [2]

a very fit person [3]
31

For office use only

60 Here are some things young people have said about health and fitness. Say which of these statements you agree or disagree with. (circle one number in each row)

	Strongly Agree	Agree	Disagree	Strongly Disagree	
Your health is something you inherit from your family	4	3	2	1	Col 33
Good health has most to do with an attitude of mind	4	3	2	1	Col 34
Our health and fitness is the doctor's responsibility	4	3	2	1	Col 35
It's up to all of us to lead the sort of life that makes you fit	4	3	2	1	Col 36
Good health and fitness is just a matter of luck for most of us	4	3	2	1	Col 37
What you eat and whether you exercise determines how healthy you are	4	3	2	1	Col 38
You can't be fit and healthy if you're living in cold, damp housing conditions	4	3	2	1	Col 39
Healthy eating costs too much	4	3	2	1	Col 40
Health is something you only have to worry about when you get older	4	3	2	1	Col 41
If I keep fit and healthy now I'll live longer	4	3	2	1	Col 42
If you're going to die anyway what difference does it make if you're fit and healthy	4	3	2	1	Col 43

YOUR VIEWS
